Last Updated Friday, 27 August 2010

Valnet broadband wireless is a great solution for anyone who wants higher speed services and aren't eligible for DSL services, or in areas where DSL services aren't even available. Our residential wireless service is a great deal at only \$39.95 per month! Need more bandwidth? Check out business services at only \$59.95 per month! With throughputs up to 1mbps wireless service is up to fifty times faster than dialup, depending on your location.

Since the service is provided via microwave, you will need to call or request a survey via the "service request" link for specific availability. This is called a "Site Survey". There is no charge, but we have to make sure that you are in range. Eligibility for service is highly dependent on location - even though the address next door qualifies, your address may not! To learn more about what impacts signal, read our short radio line of sight document.

Please note that IPTV services are not supported on our wireless network (i.e. SkyAngel), and VoIP (Vonage or similar) is not recommended.

For more detailed information or to schedule an installation appointment, call 888-332-1616 or submit a

Service Request. Wireless Services are available in the following areas:

- Independence
- Dearing
- South Coffeyville
- Cherryvale

#### Wireless Service Details

- Packages are subject to change without notice. Prices for Coffey County residents are discounted \$10 per month, in accordance with special provisions made with Coffey County.
- Service speeds are an approximate maximum. Speeds will vary depending on your service location, signal level, and traffic on the system. 2Mbps service availability is dependant on signal level, and may not be available in all locations.
- In some situations Extended Range CPE may be required, at a cost of \$499. Lease-Purchase program available with \$30 per month payments for 12 months.
- Dedicated wireless services are not available in all areas. Dedicated services are case-by-case availability and pricing. Call us at 888-332-1616 for Dedicated Wireless Service information.
