

## T1 / Multiple T1 Internet Access

Tuesday, 18 March 2008

Last Updated Monday, 22 February 2010

Valnet offers point to point T1 and multiple T1 combinations of point-to-point circuits for access solutions up to 6 T1's. Generally, applications requiring more bandwidth than 6 T1's will necessitate looking in to more suitable options such as a fractional DS3.

As with all T1 solution providers, pricing is based on where you are located and what your specific requirements are. For more information please contact us!

T1 Accounts include:

- All price quotes include all taxes, fees, and surcharges!
- Optional use of a Cisco 2600 series router included in price.
- 24/7/365 technical support - T1 Customers are provided direct access to our Network Administrator via mobile telephone.
- Router maintenance include - no charges for router maintenance or configuration updates.
- IP Allocation starting with /29 (5 usable IP's) up to /26 with documented usage.
- Subnets larger than /26 available upon request, but extra charges may apply.
